CERTIFICATE

The SCS Division of Fundamental Research (DFR) awards a

SCS LECTURESHIP AWARD 2024

to

PROF. KAZUAKI ISHIHARA

Nagoya University, Japan

for his lecture tour entitled

«Rational Design of High-performance Catalysts Based on
Acid–Base Combination Chemistry»

The tour in Switzerland took place in April 2024:

- Mon, April 8, 2024, University of Geneva
- Tue, April 9, 2024, University of Zurich
- Wed, April 10, 2024, EPFL Lausanne
- Thu, April 11, 2024, University of Bern
- Fri, April 12, 2024, University of Basel

The SCS Lectureship is awarded to world-class distinguished scientists, and it is organized under the patronage of the Swiss Chemical Society. Over a week, the lecturer gives five presentations and discusses with colleagues at four to five different Swiss research institutions. The selection of the lecturers follows a bottom-up approach where PIs from all Swiss research institutions can propose candidates. The program covers all areas of chemistry. The choice among the proposed lectureships is made by the board of the Division of Fundamental Research (DFR) of the SCS.

Prof. Dr. Thomas Bürgi
DFR President
University of Geneva

Prof. Beat Fierz
SCS Lectureship Program Director
EPFL Lausanne
